Special thanks to the Regional Autonomous Corporation of Cundinamarca, all the people from the Environmental Infrastructure Directorate who supported us in the production of this guide, to the photographers and researchers mentioned above who shared their records for the advancement of science, and to the communities of the Fúquene lagoon for welcoming us to their beautiful territory. We hope that this material will raise environmental awareness among the inhabitants and visitors of the sector, the development of ecotourism focused on birds (Avitourism), and the generation and appropriation of knowledge about the biodiversity of birds in Cundinamarca and Colombia.
